Designed by practicing pharmacists for pharmacists —
So it works the way you do!

About Intelligent Pharmacy Software (IPS)

Meditab's™ Intelligent Pharmacy Software (IPS) is a comprehensive solution for managing the business and patient needs of closed door pharmacies. It was designed by a team of pharmacists with many years of experience in the pharmacy business, so it works the way you do.

The software

- Improves workflow efficiency
- Enhances patient safety
- Considerably reduces billing time
- Significantly eliminates the use of paper
- Streamlines tasks with a click of a mouse
- Increase staff productivity

IPS will greatly reduce your operating costs, provide a significant and measurable Return on Investment, and allow you to enhance your customers' loyalty and help your business grow.

Enhance Facility's Communication with Rx Web Portal

Rx Web Portal is a comprehensive communications tool that enables facilities, pharmacists, physicians, care givers, patients and family members to access their data in a secure, HIPAA-compliant environment.

Facility Benefits

Live access to medical records to

- Order medication (including refills)
- Update patient profile information
Log MAR online
- Check drug interaction, education and compliance charts
- Auto-populate and print licensing forms online
- Generate prior authorizations in seconds (20-30 PAs in 3-4 minutes)

Automatically bill over 200 prescriptions based on

- Days supply
- Quantity billed, and
- Pills remaining in bottle

Comprehensive, detailed & customized facility reporting for

- Order status
- Refill OK
- Profiles of patients with medication changes, etc.
- Drug classification, group, etc.
- And many other unique reports...

Strategic Marketing tool empowering

- Facilities
- Pharmacists
- Providers
- Patients
- Family members
- Care givers
- Live, online support

Features / Benefits

RX WEB PORTAL

Enhances communication between facility, pharmacists, physicians, care givers and families

DIGITAL RECORDS

Streamlines prescription processing and improves workflow

PAPERLESS FAXING

Generate, edit, send, receive and link faxes to patients and prescriptions digitally

AUTO-FILL

Auto-fill multiple prescriptions; remote or centralized billing with ease

MANAGEMENT SYSTEM

Increase work flow efficiencies, enhance patient safety and reduce errors

FORM FILLER

Pre-generated prior authorization forms speed workflow

DELIVERY MODULE

Track delivery and signature with handhelds and integrated pocket PCs

Streamline Prescription Processing and Improve Workflow

Streamline your retail & closed-door operations in a single database solution. IPS is multi-pharmacy capable, completely scalable, and grows with your business. The functionality of IPS is workflow driven to enhance patient safety and drastically reduce errors, every step of the way. Integrated with the industry's leading robots, IPS streamlines your business process, overall operations and bottom line. Pharmacies are empowered with revenue generating marketing and communications tools that change the way they do business.

A Complete Management Solution for Closed Door Pharmacies

Management System Increases Efficiency

Streamline your retail & closed-door operations in a single database solution. IPS is multi-pharmacy capable, completely scalable, and grows with your business. The functionality of IPS is workflow driven to **enhance patient safety and drastically reduce errors**, every step of the way. Integrated with the industry's leading robots, IPS streamlines your business process, overall operations and bottom line. Pharmacies are empowered with revenue generating marketing and communications tools that change the way you do business.

Significantly Expand Faxing Capabilities

IPS receives faxes electronically, so they can be viewed on screen and processed without ever printing a paper copy. If desired, the system also provides for the centralized management of faxes. Prior authorization requests can be sent and received digitally via IPS fax modules.

- Receive and send faxes electronically from multiple fax lines
- Add free text notes to faxes prior to sending
- Link faxes to patients or to specific prescriptions
- Edit received faxes and resend without printing
- Directly enter approved refills from fax received screen

Expedite Billing Process To Increase Accuracy and ROI

The IPS Auto-Process automatically bills prescriptions based on days supply or pills remaining in a patient's inventory (e.g. bills 200 prescriptions within 20 minutes).

IPS automatically

- Bills multiple prescriptions based on days supply, quantity billed and pills remaining in patient bottle
- Batch claims to minimize claims transmission charges
- Populates DUR rejection overrides and re-sends claims
- Enter and approve PAs directly from rejected claims screen

Assistance With Prior Authorization Forms Speeds Workflow:

IPS will automatically fill out any prior-authorization forms – instantly, to speed your workflow process. You can quickly generate Prior-Authorization Forms in seconds (25-30+ forms can be generated in a few minutes) and you can enter the Prior Authorizations directly from the "rejected claims" screen.

Inventory Tracking

IPS will assist the pharmacy in tracking the prescription for each patient, including the amount of pills that is on file versus the amount dispensed. When a prescription is adjudicated for a quantity less than what was dispensed, the balance that was due to the patient is tracked and monitored for eventual dispensing. IPS also handles 340B inventory and can help automate other inventories like partner assistance programs.

Delivery Module

IPS delivery module is very thorough to ensure that every delivery is accurately completed and tracked and recorded. The system

- Allows delivery of checked packages only
- Track deliveries of filled packs
- Enters multiple deliveries from the Check screen and then batch them by delivery carrier
- Collects signatures on Pocket PC upon delivery
- Auto-reconciles the deliveries or manually scan in the delivery slips
- Logs COD payments and delivery mileage

Additional Features Include

Interactive Voice Response System (IVR)

The IPS Integrated Interactive Voice Response System (IVR) is like having another employee help you run your pharmacy. The system will automatically call patients with insurance billing problems and notify them when their prescriptions are ready or when refills are needed. A patient can also dial into the IVR system to obtain the status of their prescription or order new prescriptions.

Facilitated Doctor Calls

What could you do with 33 percent more time in your day? That's the amount of time most pharmacists spend on the phone with doctors discussing prescriptions. IPS is designed to help you significantly reduce the time you spend on the phone. With IPS, you can track status and disposition of all doctor calls right on your computer. In addition, the system automatically faxes refill requests to doctors and any prescriptions that need changes or have problems.

About Meditab Software, Inc.

Founded in 1998 by practicing pharmacists and physicians, Meditab Software, Inc. provides an innovative suite of intelligent, integrated and intuitive Software Solutions supporting the primary process of healthcare delivery. Based in northern California, Meditab's revolutionary software solutions connect physicians, patients, labs, pharmacies and long-term care facilities nationwide.
