1. Can you define future provider availability without affecting current provider availability?	Yes			
2. Can you define provider availability templates?	Yes			
3. Can you temporarily over-ride a provider's schedule availability without affecting the regular template?	Yes			
4. Can you schedule by resources such as EKG, Ultrasound, etc. without creating fictitious providers?	Yes			
5. Does the software track and display date, time, and user that makes or changes appointment?	Yes			
6. Can you quickly access patient information with single click from Scheduler?	Yes			
7. Can you write customized automated letters related to appointments without using Microsoft Word?	Yes			

FEATURES	MEDITAB'S IMS	COMPETITOR 1	COMPETITOR 2	COMPETITOR 3
WORKFLOW				
1. Does the software allow users to verify demographics and insurance eligibility, collect copay, and complete automated forms from one window when patient arrives?	Yes			
2. Does the software differentiate between walk-ins and appointments?	Yes			
3. Can patients check-in using a kiosk?	Yes			
4. Can users create custom flags to track where patients are in the clinic?	Yes			
5. Does the software help monitor waiting and in-room time?	Yes			
6. Can users quickly assign messages and tasks from any window they are on?	Yes			
7. Can users quickly access patient information from anywhere in the software?	Yes			
8. Does the software allow users to quickly see provider orders and schedule follow-up appointments, print patient handouts, collect copays, transmit orders electronically or via fax, and review all charges from one window when patient is checked out?	Yes			
EMR / EHR				
1. Does the EMR / EHR allow entry via Templates, Typing, Speech Recognition, Transcription, and/or Handwriting?	Yes			
2. Can providers see the EMR translation as they work so they do not have to wait to review the translation until after completing all entries?	Yes			
3. Can providers quickly make changes to their documentation?	Yes			
4. Can providers easily customize templates?	Yes			
5. Can providers reduce data entry time by determining which items should automatically copy over from previous visits?	Yes			
6. Can patient portal entries automatically populate EMR templates as discrete data instead of bringing in only text or pdf documents?	Yes			
7. Can more than one employee access and enter information for the same patient chart?	Yes			
8. Can providers create default notes that they can copy from to reduce data entry time?	Yes			

FEATURES	MEDITAB'S IMS	COMPETITOR 1	COMPETITOR 2	COMPETITOR 3
9. Can providers easily document a combination of pertinent positives and negatives such as abdominal pain associated with nausea and cramps but no constipation?	Yes			
10. Does the software allow providers the ability to create templates that aren't limited to three or four levels?	Yes			
11. Does the software allow the ability to create questionnaires that can auto-calculate scores?	Yes			
12. Does the software allow the practice to automate workflow based on provider entry in EMR?	Yes			
a. Automate prescription orders based on EMR entry	Yes			
b. Automate lab and diagnostic orders based on EMR entry	Yes			
c. Automate provider alerts based on EMR entry	Yes			
d. Automate patient education based on EMR entry	Yes			
e. Automate authorization requests based on EMR entry	Yes			
f. Automate referral requests based on EMR entry	Yes			
g. Automate billing based on EMR entry	Yes			
h. Automate inventory tracking based on EMR entry	Yes			
i. Assign tasks automatically to other staff based on EMR entry	Yes			
13. Can providers report on discrete data entered in the EMR (for example find all patients who are diabetic and where the provider has not done an eye exam in the last 6 months)?	Yes			
14. Does the software automatically prompt providers for PQRI reporting?	Yes			
15. Can providers create custom Flowsheets that auto-populate based on data entered from anywhere within the software?	Yes			
16. Does the Providers dashboard allow them to quickly review only the pertinent information from a patient's previous visits?	Yes			
17. Can providers create Custom default letters where they can choose only the information they want (for example ask the vendor if they can only choose to include only work restriction information that might be entered in the plan or ask if the provider can only include pertinent positives when sending out consult letters to avoid sending 9 pages of irrelevant information)?	Yes			
18. Does the software allow bi-directional lab interfaces?	Yes			

FEATURES	MEDITAB'S IMS	COMPETITOR 1	COMPETITOR 2	COMPETITOR 3
AUTH TRACKING / REFERRAL TRACKING				
1. Does the software have modules specific for tracking auth and referral requests?	Yes			
2. Can users auto-populate forms based on auth or referral requests?	Yes			
3. Can users document communications made while requesting auths or referrals?	Yes			
4. Can users track auth and referral requests by custom statuses?	Yes			
5. Can users reconcile auth and referral requests from received faxes and scanned documents?	Yes			
6. Can users quickly fax automated letters and forms that are needed for auth and referral requests?	Yes			
DOCUMENT MANAGEMENT / FAXING				
1. Does the software have an integrated document scanning module?	Yes			
2. Can users quickly scan documents and link them to patients and forward to appropriate staff members?	Yes			
3. Can users drag and drop documents if available in electronic format?	Yes			
4. Does the software use a non-Windows based fax appliance for stability?	Yes			
5. Can users pick and choose multiple documents and fax to multiple individuals with a single click?	Yes			
6. Can users see detailed log of all faxes directly from within the software?	Yes			
BILLING				
1. Can billers quickly see all pending visits that have to be billed?	Yes			
2. Can billers send messages, tasks, and alerts to other staff in the practice?	Yes			
3. Can billers automate alerts based on insurance plans and CPT codes?	Yes			
4. Can billers quickly review clinical documentation entered by providers?	Yes			
5. Can billers quickly enter charges manually or auto-populate based on electronic superbills?	Yes			
6. Can billers create multiple fee schedules based on providers, locations, and date ranges?	Yes			

FEATURES	MEDITAB'S IMS	COMPETITOR 1	COMPETITOR 2	COMPETITOR 3
7. Does the software alert billers of missing information?	Yes			
8. Can billers store insurance specific websites linked to the insurances?	Yes			
9. Can billers perform batch eligibility checks?	Yes			
10. Can billers utilize ERA to auto-post payments?	Yes			
11. Can billers scan EOB's and assign specific page numbers when paper EOB's are sent?	Yes			
12. Can billers review charge entries and payment history on the same window while posting payments?	Yes			
13. Can billers track rejections and write-offs?	Yes			
14. Can billers quickly transfer multiple billed charges from one insurance to another insurance with a single click?	Yes			
15. Can billers quickly correct charges from any billing window?	Yes			
16. Does the software have an interactive collections module instead of running paper aging reports?	Yes			
OTHER EMO (Electronic Medical Office) FEATURES?				
1. Does the software have a marketing module to track referral sources and document contact with referral sources?	Yes			
2. Does the software have a Report Builder?	Yes			
3. Does the software have a language translator module?	Yes			
4. Does the software have an Organizational Chart tool?	Yes			
5. Does the software have a Network Diagram tool?	Yes			
6. Does the software have an in-built drug dispensary module?	Yes
