An EHR solution that helps you better manage all aspects of women’s healthcare
Whether your patients need annual well woman exams, management of pregnancies, or hormone replacement therapy, with IMS Clinical™ you can easily document each patient encounter in the EHR with just a few simple clicks. Our exclusive “Link With” technology allows you to link to pre-formatted symptoms and treatments for common conditions to improve care and patient flow.

By using these protocols, you can complete visit notes for common women’s health issues such as fibroids, cervical conditions, and more in mere seconds. IMS Clinical minimizes the time it takes to document a patient visit while providing you with a comprehensive visit note. The result is simple you see more patients and your patients receive better healthcare.

The highly complex specialties of Obstetrics and Gynecology require a highly detailed level of documentation to develop appropriate care plans and produce the best clinical outcomes. In Obstetrics, complete, precise documentation is particularly important because it involves the health of both mother and baby. When women have high-risk pregnancies, this takes on even greater significance. That’s why IMS Clinical features customizable templates designed to work extremely well as they are, but flexible enough so that they can be modified to fit your specific documentation needs as well. Templates developed exclusively for your specialty are available for conditions that include ectopic pregnancy, miscarriage, uterine prolapse and more.

Whether Dealing with Pregnancies or Preventative Care, Acute or Chronic Conditions
You Name It, IMS Can Help Your OB/Gyn Practice Manage It

Women’s health is an area of specialty that is unique in that you may have a patient age range that runs from teens up to seniors. You deal with a multitude of conditions that require flexibility and expertise. IMS Obstetrics and Gynecology helps you address the complexities of women’s healthcare with a fully integrated solution for Electronic Health Records (EHR), practice management, patient portal, reporting/analytics, e-prescribing and much more. It allows you to completely automate your practice with cloud or server-based options to provide optimized care for the women you serve. Streamline documentation, improve communication and increase efficiencies with a solution tailored to fit the unique needs of your practice.
Benefits of IMS Obstetrics and Gynecology

» Enhance the quality of care already being provided and better manage risk.

» Virtually eliminate the paper clutter and free up file storage space for productive use.

» Deliver care summaries & other information required by Meaningful Use.

» Reduce office expenses related to chart creation and paper document printing.

» Use built-in reporting tools to analyze your practice’s patterns for pay-for-performance, meaningful use requirements, quality measurements, and business analysis.

» Allow patients to complete forms with an integrated patient portal and in-office kiosk.

» Achieve interoperability and connectivity with other health care entities, pharmacies and labs for referrals, orders, and results.

» Receive local ongoing support from a national team of industry experts, IMS Authorized Partners, dedicated to serving the needs and interests of family practitioners.

» Automate prescription writing, drug interaction and formulary checking with automatic alerts, and a fully-integrated drug database.

» Decrease labor-intensive chart pulls and re-files for records requests and audits.

» See more patients in less time.

» Eliminate transcription costs.

» Qualify to receive HITECH incentive payments.

» Reduce billing errors & denials, and receive greater reimbursements faster.
ENHANCE YOUR PATIENT COMMUNICATIONS

You can simplify your visit notes and patient documentation for expectant mothers with the integrated OB chart in IMS Clinical. It includes sophisticated features such as gestational age defaults and multiple text input options for rapidly entering standard notes and specialized instructions. Streamlined flow sheets and visit notes along with integrated e-prescribing, e-labs, and patient portal allow you to track overall progress as well as optimize patient/provider communications.

Speaking of communications, the IMS CarePortal gives your patients access to their health record 24/7 online - from the convenience of their home or wherever they want to login. Patients can go online prior to their office visit and complete pre-visit forms and update their insurance information, resulting in reduced wait times in the office - a huge benefit both you and your patients. Additionally, you can provide care plans and patient education material online which helps your practice meet Meaningful Use requirements.

“I particularly appreciate the flexibility and mobility that IMS offers. For example, I had a patient go into the hospital one night and I was able to send all the information the doctors there needed, including the EKG and echocardiogram, from home. This made my life a lot easier and the emergency physician was pleased with the streamlined transfer of information too.”

— Dr. Priti Patel, Lindenhurst Medical Practice

“The e-prescribing function in IMS is flawless and because of it we’ve been able to attest to Meaningful Use and already received our first two incentive checks.”

— Dr. John Fritz, Hudson Primary Care
IMS easily tracks pregnancy milestones so that you can provide patients with the most accurate dates possible.

In Obstetrics and Gynecology, complete accurate charting is important for the health of your patients and to minimize risk for your practice. With IMS, your staff will no longer have difficulty finding historical data or care plans buried in paper charts. You can have multiple people accessing an EHR at the same time making updates and assigning tasks. Plus, you can say “goodbye” to sticky-notes attached to folders for your review. Electronic tasks and reminders are built-in to IMS and provide a convenient, trackable means of communicating what needs to be done and what’s important.

Best of all, you can conveniently access IMS from anywhere, at any time, whether it’s in your office, from another remote office location, on your mobile device, or even at home. Enjoy the confidence of knowing that even if you’re on-call for the weekend, you can still have a patient’s complete record right in front of you with a few clicks of the mouse. Additionally, when an expectant mother goes into labor, her electronic health record will be easily accessible from any location at any hour of the day or night.

**ACCESSIBILITY MEANS GREATER CONVENIENCE FOR ALL**

**EGA 34 weeks and 5 days**

**Conception Occurred 5/28/2012**

**First Trimester Ends (12 weeks) 8/6/2012**

**Second Trimester Ends (27 weeks) 11/19/2012**

Access ultrasound images with just a few clicks to monitor pregnancy progress.

IMSGo Lab Ordering And Tracking

IMSGo Facility Check-In
### Templates for Obstetrics and Gynecology
Documenting conditions and symptoms is faster and more accurate using intuitive women’s health templates. Access comprehensive clinical content — document a complete office visit, including pre- and post-op appointments, with user-friendly, OB/GYN specific templates and a built-in OB-chart.

### Clinical Decision Support
CareProtocol provides users with HPI templates for common conditions and lets you use them as they are or modify them to meet your practice needs. With a comprehensive clinical flow chart that lets you chart by exception, you can quickly and accurately document each encounter.

### Exclusive “Link With” Logic
Link to pre-formatted symptoms and treatments for common conditions to complete visit notes for common diagnoses in just seconds.

### One Click Access to Patient Data
Access the patient record screen from anywhere in the EHR with one click. Intuitive interface features collapsible side link panels giving you as little or as much information you want to see on a single screen.

### E-Prescribing
The flexible and comprehensive IMS OrdersPlus prescription module tracks medications and refill history. Improve patient care with drug education integration, dosing, allergy, and drug interaction and contraindication checks.

### “My Tasks”
The “MyTasks” dashboard helps you manage your time and outstanding work-to-do by drawing your attention to items such as your schedule, newly arrived lab results, unsigned encounter notes and tasks that you’ve assigned to staff or have been assigned to you and your appointments for that day.

### Health Maintenance Reminders
Easily manage chronic conditions with Health Maintenance tools that provide you with patient education, alerts and reminders - all critical to Stage 2 MU compliance.

### Lab Ordering, Reviewing and Tracking
Supports HL7 interface so you can send or receive diagnostic lab orders electronically using IMS OrdersPlus. Customized test templates and pre-printed order forms. Pre-import checking. Comparative and graphical representation of lab data saving physicians’ time.

### Patient Portal
The IMS CarePortal provides patients secure, online 24/7 access to their health information to: request appointments and prescription renewals, pay their bills, access educational information, complete pre-visit questionnaires, upload required documents and forms and more.

### Reporting and Dashboards
Over 100 report options empowers office administrators to produce easily generated summaries or detailed overviews of every aspect of the medical office operation. Additionally, with integrated Meaningful use Dashboards, administrators can gather real-time indications of their current Meaningful Use levels and even drill down and review patients contained in the reporting. Customized Reports allow for the monitoring of CMS-required data elements and quick exporting of the data for attestation.

(cont. on next page)
| **E-Faxing** | The integrated IMS FaxCloud e-fax solution eliminates fax machines, cuts costs, and makes sending and receiving faxes a breeze. |
| **Auto Check-In** | Auto Check-In Kiosk feature lets patients Check-In on their own. This feature reduces workload and helps in managing a higher patient flow. |
| **Billing and Collections** | Keep finances on track with tools to: generate Super Bills, provide strong validations, pre-check EM codes, CMS-1500 or UB92 claims, automatically reconcile accounts (ERA), and enhance collections. A built-in E&M Coding calculator helps to prevent lost charges and to maximize reimbursement. |
| **Authorization & Claim Scrubbing** | Reduce missing authorizations and claim rejections with authorization checking at Check-In and Charge Posting. Authorization requirements can be set by procedure and insurance criteria. |
| **Bar Coded ID Cards** | Register patients with accuracy and speed using fully automated Bar-Coded ID Cards. Have accurate patient verification and correct critical data with just a swipe. ID cards can be printed from the scheduler, at check-in/out and reports. Manage high patient flow with a fast and accurate check-in process. |
| **Document & Image Management** | Condense and organize files into a user-friendly, easily accessible digital document file cabinet. Organize documents with customized folder tabs, the integrated fax management module allows you to fax from the system, scan in documents, images, driver licenses, insurance cards, and more. |
| **Scheduler with Automated Appointment Reminders** | Easily schedule patients with the intuitive, color-coded interface and setup automated reminders to call patients to confirm their appointments. Minimize no-shows, increase your practice’s revenue and improve your office efficiency. Select from a variety of standard messages or create your own custom message, or if you would prefer the option of a live-person appointment reminder/scheduling service IMS supports that option as well. Receive a printed report of who was reached and who was not for greater accountability. |
| **Referral Management** | Built-in tools for referral tracking, letter generation and communications makes it easy for primary care providers to communicate with referring providers. Forms and letters for patient referrals are automatically populated with patient data, treatment and provider information and feature customizable input fields for those patients with unique needs. Inbound referral letters can be scanned or faxed directly into the electronic patient record. |
| **Mobile / Device Options** | IMS Go - available for iPad, iPhone and Android - gives providers secure mobile device access to their existing IMS EHR and practice management systems for anytime, anywhere access to critical patient data. IMS is also Tablet PC enabled and supports voice, stylus, mouse or keyboard data entry. |
| **Delivery Platform Flexibility** | Client-server, cloud or micro-cloud-based delivery models are available to suit the needs of each individual practice. |
Automation systems that maximize productivity, advance patient care, manage utilization, and reduce costs. Meditab develops and supports a multi-award-winning, multi-certified Electronic Health Records (EHR) system that combines clinical charting, e-prescribing, population management, decision support, practice analytics, document imaging and much more, on a single database platform. The company takes tremendous pride in providing comprehensive, user-friendly, and affordable solutions for each practice's unique needs. Time tested and proven, IMS generates tangible returns for medical practices of all sizes. Headquartered in Oakland, California, with offices across the globe, Meditab supports hundreds-of-thousands of users nationwide.
